The Ilula Orphan Program has committees in Norway, USA, The Netherlands, Denmark, Sweden, Italy, Germany and Luxembourg.

Eneza Nyaluke (27)
Teacher at Sollerud Kindergarten Tanzania, Ilula Orphan Program (IOP)

In 2003: Eneza was sharing the destiny of 4 million orphans left in poverty in Tanzania. She was left with two choices. To beg and live off random handouts or become a prostitute. She had no income, no job, and no relatives to rely upon.

Berit Skaare (73)
Founder of the Ilula Orphan Program - IOP

Berit Skaare is a Norwegian teacher and idealist. She was brought to Tanzania to help out with a water project, but discovered that the poor girls were the most in need. So Berit began to build, to collect money, to get the young girls off the streets, out of poverty, into school.

IOP achievements so far:
IOP Orphanage: 74 orphan girls have called it home, 2000 individually school sponsored children, 530 children in local foster care homes, 614 toddlers got education from Kid’s Corner Preschool, 210 boys and girls have been educated at the The Lord’s Hill Secondary School, 115 children have got education at Sollerud kindergarten Tanzania-, 540 children will be educated at the Sunflower Primary School (to be opened partly 2018), 36,700 persons tested for HIV, 6737 Most Vulnerable Children assisted with economic empowerment programs and 63,000 persons received food and nutrition education, 95 jobs created by IOP for the Local Community, food store, cafe, offices, carpenter shop, shoe repair store, welding shop, paving machine (brick and wall elements), chicken house (450 eggs per day), cows and goats.
Creating economic indepenciency

Berit Skaare has turned 73 years, and has started on her new project, building the African farm. Berit's goal is to secure a future for the people she loves. And to do so in a sustainable way.

The Farm for the future (651 acre)

Milk and meat

- 30 Milking Cows (25 liters per day)
- 50 Goats
- 50 Other animals

Produce

- Maize
- Common bean
- Soybean
- Sunflowers
- Sweet potatoes (test crop)

Sustainable power and clean water

- Solar energy (10 KW)
- Wind energy
- Biogas
- A water well

Our associates

- Sokoine University of Agriculture (SUA) in Morogoro
- SAGCOT (Southern agricultural growth corridor of Tanzania)
- NMBU (Norwegian University of Life Sciences)
- Yara International ASA
- The Royal Norwegian Society for Development (Norges Vel)

Cooperation with

- Norwegian Church Aid (VICOBA and IOP Integrated Community Empowerment Project)
- YWCA/YMCA Y-Global (Young Mother Empowerment Centre and Education)

Why start a farm

IOP is taking a grip on regional problems like unemployment, poverty, low farming knowledge, malnutrition, low crop productivity, social exclusion e.g. young single mothers, and children left alone to take care of themselves. The farm is a commercial farm and also a capacity building arena for young single mothers, local farmers and students, kids from Sunflower/Sollerud and other schools in the district. Using renewable energy the farm will also help reducing deforestation (charcoal and fire wood).

“I like this project. This is very important for the region. I will make all my people good ambassadors for Farm for the Future”.

Hon. Amina J. Masenza
Regional commissioner - Iringa
The United Republic of Tanzania

The choice of produce is based on preliminary studies in the region, to secure maximum effectiveness and profit. The farm will be an economically viable commercial farm, selling the produce on the market.
The ownership of the farm will be divided amongst shareholders both internationally and locally. Norges Vels shares will by time be transferred to local interests. The local ownerships will be a combination of in-kind contribution and capital. IOP has bought and owns the land.

Creating a leadership culture.

**Ownership and organization**

- IOP (51%)
- Investors
- Local farmers
- Young single mothers
- Norges vel

**Business plan**

- SWOT Analysis
- Income generating activities
- The produce
- The renewable energy production
- The infrastructure of the farm
- Project implementation and supervision
- Time frame
- Environmental assessment
- CSR
- Risk Analysis
- Human resources
- Financial analysis

**Net cash flow USD**

**Total fundraising:**

- Buildings 7 MNOK + Machinery and Equipment 1.5 MNOK, 8,5 MNOK (USD 1.0 million)

- Cash needed year one to start operation before any income, 4,5 MNOK (USD 0.5 million) included renovation:

**Total fundraising needed:** 13,0 MNOK (USD 1.5 million)
Why engage?

- To create skilled jobs and more equality
- To empower young single mothers
- To improve farming knowledge among local farmers and youth
- To give yourself an opportunity to participate in the local development of Ilula
- To be able to get a return on an investment after 4 years
