

[#ThanksGiving, 26th November 2020.](#)

Greetings from Ilula Orphan Program!

We are thankful to God that we are able to share with you our greetings and that we are ending the year 2020. The year 2020 which was full of challenges and thanks to God, successes were manifested in our community works. IOP shares the deepest and sorrowful condolences to the families whose loved members lost their lives.

IOP appreciates Affiliated Committees, sponsors, donors and all friends who did not get tired to assist during this difficult year. It is by Grace of God that we are alive and continuing with our community works.

We're grateful to you who collectively worked and encouraged us during this difficult time. We want to acknowledge and appreciate the efforts of our colleagues at all levels and the IOP's Community for your continued cooperation and support of the most vulnerable children and communities in Ilula, Tanzania. On behalf of the Ilula Community and our staff who are working tirelessly to slowly recover from the scars left by COVID-19, we pray for those who have supported our girls and boys to go to school, despite themselves being under the tensest situation of COVID-19.

It was a very unique situation to continue enjoying the love of generosity from our friends who coordinate sponsorships, grants and donations in different Countries, despite they themselves facing corona virus. This kind of love, inspires and continues to indebt us in our daily activities.

We are truly inspired by their personal commitment to making a difference in these extraordinary and challenging times.

Our commitment to effectively guide and support our needy students and Community members continues to be one of the best promises to you.

As we approach the end of the year 2020, with the thanking heart, I am inviting you to donate to our program through <https://www.umcmmission.org/Give-to-Mission/Search-for-Projects/Projects/15159N> link coordinated by

The support will enable IOP provide school fees to students, support the IOP Center for Vulnerable and Orphaned Girls and provide Health Insurance to the orphaned students in various schools, colleges and Universities in Tanzania.
